

Card sort activity – completed at the beginning of a unit of work related to water issues and after a unit of work related to environments in danger, geographical concepts such as sustainability, use, pollution and management had already been covered, the unit on water issues would extend these concepts by applying them to a new context. Students arrange the cards as they like and add links to explain connections between the concepts, they could add extra concepts to the blank boxes if they wish to.

Kaitiakitanga	Development	
Water supply	Pollution	Climate
Conflict	Urban areas	Management
Irrigation	Regulations	Flooding
Drought	Demand	Sustainable
Communities	Aroha	Use
